## SOFTWARE ENGINEERING

### PERSONAL PROFILE

Passionate Software Engineering graduate from Asia Pacific University. Looking forward to apply my knowledge and experience to become a contributor to your company. I am eager to be part of your organization and grow professionally.

### WORK EXPERIENCE

#### Alphacore Technology Software UI/UX Developer

Kuala Lumpur, MY  
Sep 2021 – Present

- Develop a new healthcare system with the Laravel PHP framework, participate throughout the whole software development life cycle, beginning with planning and ending with deployment.
- Design (UI/UX) wireframes and translated into high-quality code that provides visual impacts for the application (front-end), as well as integration with RESTful APIs.
- Participated in the development of the health care system's frontend, backend, and API. Debug, resolve errors, maintain databases, and deployment for the system.

#### SRG Asia Pacific Software Engineer

Kuala Lumpur, MY  
Sep 2020 – Aug 2021

- Part of a software development team that utilized Agile Methodology, C# (MVC), and PHP (Laravel) programming to build a call center dialer application that have integration with RESTful API and a MySQL database.
- Supported and maintained the call center dialer software (vici\_dial) during critical periods for any troubleshooting, created and implemented automated unit testing in PHP and report generated to ensure business logic satisfies user requirements and detect code issues.

#### George Healthcare Berhad Web UI/UX Developer

Kuala Lumpur, MY  
Sep 2019 - May 2020

- Part of a software development team that created medical business ecommerce apps. For George Healthcare Berhad, collaborated with a programming team to develop a web-based application solution.
- Created with the help of a PHP and a MySQL database, Utilized the Laravel software development framework, designer for the UI/UX.
- Using ReacNative, I created a low-fidelity mobile web application prototype for Healtopedia and Doctor4u.
