

MUHAMAD ARIFFUDIN

SOFTWARE ENGINEERING

PERSONAL PROFILE

Passionate Software Engineering graduate from Asia Pacific University. Looking forward to apply my knowledge and experience to become a contributor to your company. I am eager to be part of your organization and grow professionally.

WORK EXPERIENCE

SRG Asia Pacific SDN BHD

Kuala Lumpur, MY

Software Engineer

Sep 2020 – Present

- Participated in a software development team to create the integration of the call centre dialler application using Agile Methodology and Java, PHP (Laravel).
- Designed and built an API framework as well as a MySQL database connection. Supported and maintained the call center dialer software during critical periods for any troubleshooting difficulties.
- Designed and implemented automated unit testing in PHP and Java to ensure business logic fits user requirements and to detect code problems.
- Involved in the branching strategy design process for many team projects and worked closely with the ETL team and the Business Analyst throughout the project cycle.

George Medical Gateway

Kuala Lumpur, MY

Web Developer

Sep 2019 – Jun 2020

- Worked as part of a software development team that built medical business ecommerce apps. I worked with a programming team to create a web-based solution for George Healthcare Berhad.
- Created with the help of a PHP Web application and a MySQL database, Utilized the Agile software development framework.
- Using ReactNative, I created a low-fidelity mobile web application prototype for Healtopedia apps.

George Medical Gateway

Kuala Lumpur, MY

Web Developer [Internship]

Jun 2019 – Sep 2019

- Web hosting and database transfer were conducted from an outdated to a better and quicker web server.
- Used a test script to do manual testing on a web application and firewall configuration, reporting bug issues as log reports.

Web Creative Solutions

Kuala Lumpur, MY

Web Developer

May 2017 – Apr 2018

- New features and functions are created and deployed. Creating the website's architecture, as well as all of the CMS's technological components, and maintaining and optimizing speed and availability.
- The websites were designed to be both responsive and efficient. The look of the website has been improved, and it is updated and backed up once a month.

Dream Space

Kuala Lumpur, MY

Web Developer [Internship]

Feb 2017 – May 2017

- Contributing to the development of new features and functions. The architecture of the website has been designed and is being guided.
- Maintaining the CMS's performance, availability, and functionality while also supervising all technical components.
